

Kelly Bartoletti

Thank you for the opportunity to re-run for the SG Board of Directors. A quick rundown of my past experiences that have served me well during this past term on the board:

- My first career was in the management of corporate travel agencies specifically for the US Congress and very large corporations.
- My next career for over 18 years was with Citigroup as a Sr. VP Project Manager on the credit card side of the business.
- After I retired from Citi, I partnered with a nutritional programs company and I continue in that business with my brand YOU, Only Healthier.

My husband Marco and I moved here from Long Island in 2019, a bit before COVID, renting a home way down at the end and bought here in 2020...or was it 2021?

I have served on this board for 3 years and as the Secretary for 2 1/2 of those 3 years. I have fully immersed myself in this neighborhood and on this board for all of these 3 years - through the good and the challenging. For all of our sakes, I want this neighborhood to flourish - like, BIG time flourish. WE DESERVE IT. This community has been through quite a bit especially before I got here and I always want to honor and value that journey and dearly want us to come together and move forward, continuing to become a more solid and unified community. And we ALL need to do our part and I want to continue to assist in facilitating that by listening, playing fair, and educating anyone on the history of Sea Gate and how and why it impacts us now. If you give me your vote - thank you! If not, that's ok too...I'll still hear you out and go to bat for you as long as you're willing to contribute, get involved, and help to be a part of the solution. Thank you for your time! #seagatestrong

Amy F. Damron

I am a dedicated Epic Systems Analyst for Revenue Cycle at Carolina East Health Systems, bringing 24 years of experience in Healthcare Administration to the table. This past year has been particularly fulfilling as I've worked to build and optimize the revenue cycle within the EPIC system. With a degree in Health Information Management, I've had the privilege of leading important projects, such as saving an infusion clinic through thoughtful data analysis and creating presentations that resonate with administration. I also identified over \$500,000 in missed surgical charges, which highlights my commitment to making a real difference in our healthcare delivery.

Originally from Ohio, my husband and I relocated to Sea Gate in February 2020, just before the pandemic unfolded. Despite the challenges we all faced during that time, we quickly fell in love with this community and the warmth it offered. Now, after five wonderful years here, I'm eager to contribute to the growth and success of this place we call home.

Outside of my professional life, I deeply cherish the time spent with my children, Haley and Nick, as well as our three granddaughters and our newest grandson. Family is truly at the heart of everything I do.

With strong ties in both Ohio and Kentucky, my husband, a former Marine currently serving at the Department of Defense, and I feel incredibly grateful for the opportunity to return to such a vibrant community. We are excited to be part of it and look forward to supporting one another as we grow together.
